

REMARKS

Applicant has amended the claims 16, 18, 24, 26, 29, 31, 35 and 36. Applicant respectfully submits that these amendments to the claims are supported by the application as originally filed and do not contain any new matter. Accordingly, Applicant will discuss the Office Action in terms of the claims as amended.

The Examiner has rejected the claims 16, 18, 24, 26, 29, 31, 35 and 36 under 35 USC 112, second paragraph as lacking antecedent basis. Applicant has amended these claims and respectfully submits that there is proper antecedent basis and the claims 16, 18, 24, 26, 29, 31, 35 and 36 comply with the requirements of 35 USC 112, second paragraph.

The Examiner has rejected the claims 16, 18, 24, 26, 29, 31, 35 and 36 under 35 USC 112, first paragraph as failing to comply with the enabling requirement and particularly failing to describe in the application as originally filed the limitation of "and about arrival at a specified place of a mobile electronic apparatus, the positional information of which is obtained from a predetermined server apparatus over said communication network".

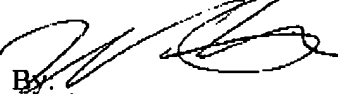

In reply to this rejection, Applicant respectfully submits that the Examiner is incorrect in his position. In particular, Applicant respectfully submits that the application particularly describes and enables this function. In support of his position, Applicant directs the Examiner's attention to paragraphs [0040], [0041], [0055] and [0060] of the publication together with Figure 6B. Still further and for the convenience of the Examiner, Applicant directs the Examiner's attention to page 10, first full paragraph, the paragraph bridging pages 13 and 14 and page 15, first full paragraph. Applicant respectfully submits that shown therein is the description that the trigger condition includes arrival at a specified place by the mobile electronic apparatus and the position of the mobile electronic apparatus (mobile phone 3) is obtained periodically by communication with the position server of the mobile phone.

In view of the above, therefore, Applicant respectfully submits that there is sufficient and enabling disclosure of the limitation of "and about arrival at a specified place of a mobile electronic apparatus, positional information of which is obtained from a predetermined server apparatus over said communication network". Therefore, Applicant respectfully submits that the claims 16, 18, 24, 26, 29, 31, 35 and 36 comply with the requirements of 35 USC 112, first paragraph as well as the dependent claims 20 through 23 and 28.

In view of the above, therefore, it is respectfully requested that this Amendment be entered, favorably considered and the case passed to issue.

Please charge any additional costs incurred by in order to implement this Amendment or required by any request for extension of time to QUINN EMANUEL DEPOSIT ACCOUNT NO. 50-4367.

Respectfully submitted,

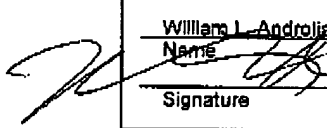

William L. Androlia
